SUMMARY

MERN Stack Developer and Competitive Programmer with strong expertise in building scalable web applications and solving complex problems using Data Structures & Algorithms. Experienced in full-stack development, REST API design, authentication systems, and responsive user interface development.

EDUCATION

CVR College of Engineering , Hyderabad	2023 – 2027
B.Tech in Computer Science and Engineering	CGPA: 8.02
TSWRS/JC (COE) Boys , Telangana	2021 – 2023
Intermediate (MPC)	954/1000
TS Residential School , Telangana	2016 – 2021
SSC	10 CGPA

TECHNICAL SKILLS

Languages: Java, JavaScript, Python (Basics), C (Basics)

MERN Stack: MongoDB, Express.js, React.js, Node.js

Frontend: HTML, CSS, JavaScript (ES6+), React, React Hooks, React Router

Backend: REST APIs, JWT Authentication, Middleware, MVC Architecture

Database: MongoDB, MySQL

Core Concepts: Data Structures & Algorithms, Object-Oriented Programming, DBMS, Operating Systems, Computer Networks

Tools: Git, GitHub, Postman, VS Code, Netlify/Render

PROJECTS

LearnHub — Learning Platform (MERN)

[GitHub](#)

An intuitive MERN-based platform where students can find and book teachers for online and offline learning sessions. The application includes features such as smart search, scheduling, and user dashboards to enhance accessibility and promote equal learning opportunities. Built using React for a dynamic frontend and Node.js, Express, and MongoDB for scalable backend services, applying concepts such as RESTful API design, JWT-based authentication, MVC architecture, database schema design, and efficient state management.

CareBridge — Donation Platform (MERN)

[GitHub](#)

A full-stack MERN application connecting donors with individuals in need of food, clothing, and education. The platform enables users to register as donors or receivers, post requests, and track contributions, fostering community engagement and social impact. Developed a dynamic frontend using React and integrated backend services using Node.js and MongoDB, utilizing concepts such as authentication and authorization, CRUD operations, API integration, state management, and modular component design.

Portfolio Website

[Live](#)

Designed and developed a personal portfolio website to showcase projects, technical skills, and achievements. Implemented a responsive user interface with a dark/light mode toggle and optimized performance for improved user experience. Applied concepts such as responsive design, component-based architecture, DOM manipulation, and performance optimization. Deployed using Netlify and Render.

ACHIEVEMENTS

Solved **350+** LeetCode problems (**1500+** rating) and **200+** CodeChef problems (**1420** rating).

Participated in **120+** competitive programming contests.

Winner — **CMR HackFest 3.0 National Hackathon (2026)**.

Gold Streak Badge — Smart Interviews (Data Structures and Algorithms).
