PROJECTS

LearnHub — Tutor & Student Learning Platform (MERN)

[Live](#)

- LearnHub is an online learning platform that helps students improve technical and career skills through courses, guidance, and problem-solving practice. It connects students with teachers for flexible learning and doubt clarification. Teachers also benefit by teaching students during their convenient hours, earning opportunities, and sharing knowledge effectively through scheduled learning sessions.
- Implemented JWT authentication and role-based access control for students, tutors, and admin.
- Developed responsive dashboards and REST APIs using React.js, Express.js, and MongoDB.
- Optimized backend performance and MongoDB queries, reducing API response time by **30%**.
- Used MVC architecture and deployed using Netlify, Render, and MongoDB Atlas.

CareBridge — Donation Platform (MERN)

[Live](#)

- Built a donation platform connecting donors with users needing food, clothing, and education support.
- Implemented authentication, CRUD operations, and dynamic UI rendering using React.js.
- Developed REST APIs and MongoDB-based workflows for donation management.
- Improved page load performance by **25%** through optimized API handling and state management.

Portfolio Website

[Live](#)

- Developed a responsive portfolio website showcasing projects and technical skills.
- Implemented dark/light mode and optimized UI for cross-device compatibility.
- Improved frontend accessibility and performance using modern React practices.

ACHIEVEMENTS

- Participated in **150+ programming contests**.
- Awarded **Gold Badge in Data Structures and Algorithms** from **Smart Interviews**.
- Solved **350+ DSA problems** in LeetCode and 200+ in CodeChef.
- Achieved **1550+ LeetCode rating** and **1400+ CodeChef rating**.
- Participated and Shortlisted for Final Round— **CMR HackFest 3.0 National Hackathon (2026)**.
- Completed **Data Structures and Algorithms Certification** from Smart Interviews.
